Equipment of hydrocolontherapy

www.cleancolon.it

“Malfunctioning of the digestive system is one of the main contributing factors to ill health, particularly in chronic illnesses. Restoring the digestive system to optimum health, by the removal of accumulated waste products, ultimately lead to overall health of the individual”

BENEFITS OF COLON HYDROTHERAPY

Colon Hydrotherapy is an effective and safe method of removal of toxic waste. Colon Hydrotherapy involves the use of water heated to the correct temperature, inserted into the body whilst continually regulating the flow for a through cleansing of the large intestine: rectum to caecum and to rectum, resulting in the complete evacuation of the waste products.

Colon Hydrotherapy is a quiet and odourless treatment.

The therapeutic benefits of the colonic washout brought about by the combined effects of regulation of the flow and temperature of the water, results in toning of the large intestine as well improved peristaltic action of the digestive tract, in the initial stages.

In addition, the cleansing action (mechanics) of colon hydrotherapy, together with the use of natural health products: phytotherapy and pre-probiotics, (pharmacology) introduced during the treatment, improves transit time, which is a crucial but frequently, overlooked aspect of digestion.

Therefore, the beneficial effects of colon hydrotherapy, re-establishes the optimum condition for the growth of healthy intestinal bacteria.

INDICATIONS FOR HYDRO-COLON THERAPY

Gastroenterology	Dermatology	Psychosomatic disturbances
a. Constipation b. Parasitic infections c. Diarrhea d. Diverticulitis e. Infection mycotic f. Bloating and flatulence g. Food intolerance h. Preparation of colonoscopy	a. Psoriasis b. Dermatitis c. Acne Circulatory a. Cellulites b. lymphotoedema	a. Depression b. Insomnia c. Stress

Since hydrocolonotherapy detoxifies the body it is very beneficial and widely used in sport medicine. Moreover, it is automatically used in the rehabilitation of neurological and geriatric patients. The deep cleansing action of hydrotherapy is highly recommended as a preparation in the following medical examinations: colonoscopy, radiology and ultrasound of the colon..

The 004RA is made in Italy and it is the only hydrocolonotherapy appliance currently available with a certificate **class II B** in accordance with the attached III of the CEE Directive 93/42, for medical appliance acknowledged by Decreto Legislativo n. 46 issued on 24/02/1997.

The Masini Institute n. 0068 is recognised by the Ministry of Health, which certificated 004RA equipment.

Unique features

- During the therapy, the power is supplied by battery instead of electricity.
- The temperature of the water is controlled by a safe and secure electronic device with a built-in audible alarm.
- Water pressure is controlled by a manostat, safety valve and an audible alarm.
- The appliance has a built-in automatic valve to prevent blockages.
- The hydraulic system consists of no. 5 non-return valves.
- 004RA is fitted with a special Pall filter with a filtration rate of 0,2 µm, thereby stop ping legionella, pseudomonas and yeast infiltration.
- 004RA comes with single-use speculum and safety belt patented nr. 013180411
- The 004RA is fitted with a remote control whereby both doctor and patient can press a button to control the following-in and discharge of water. This is very advantageous because the doctor is free to massage the patient or carry out any other relevant action in the course of the therapy.

004RA contains a single-use speculum with a corrugated water tube which can be extended to 1.50m. The extended tube prevents it from bending, thereby eliminating the remote possibility of accumulation of pockets of water in the pipe. The patented safety belt keeps the speculum firmly in place, hence preventing it from slipping out.

004RA has been manufactured to very high safety standards. Cleancolon Italy is keen to extend this service to all its customers in project management with the emphasis on operating the room layout, safely installed, and tested to ensure optimum performance.
